Pvah is a convenient drive from all parts of the Lehigh Valley as well as upper Montgomery County and upper & central Bucks County. Simply take Route 309 to the main intersection in Coopersburg (Quakertown National Bank & Burger King). Turn East onto Station Ave. Drive 4.7miles (Station Ave becomes State Rd) and look for the large PVAH entrance on left. More detailed directions online.

Pet Resort & Spa

You'll find everything here for your wonderful resort vacation. Our suites are fully air-conditioned in summer and heated in winter. We maintain a controlled and comfortable temperature all year round. Cats will luxuriate in our state of the art cattery, secluded from their neighboring canines!

The staff at Lucky Chance Pet Resort and spa is dedicated to making you feel at home. Our regular diets are planned, regulated and monitored, and the fresh water setups come from our "chemical-free" well. Routine medication &/or specialty foods administered by request and monitored by our staff.

If illness occurs, our Resort's staff and veterinarians will administer immediate attention in our complete infirmary and hospital facilities.

Daytime Activities: You will enjoy stereo music for soothing relaxation, outdoor playtime and Guided Nature walks (by family request).

Bring a veterinarian's statement showing your latest inoculations. We do insist on a current rabies & distemper vaccination as well as bordetella and influenza for dogs. If necessary, the Resort will arrange for booster inoculations.

Reservations required to assure availability.

Rates and add'l amenities available upon request

AnWell Veterinary Rehab

- Hydrotherapy
- Massage, range of motion & stretching
- Cold & heat applications
- Individualized conditioning/strengthening/exercise programs
- Electric muscle stimulation
- Land Treadmill Therapy
- Therapeutic Ultrasound
- Therapeutic Cold Laser Treatment

Hydrotherapy treatment benefits dogs because:

- Warm water enhances pain reduction and increases the extensibility of muscle tissue and tendons; variable height allows for adjustable weight-bearing
- Older animals with joint problems can exercise effectively by taking pressure off their joints in water
- Improved circulation, restores mobility, strengthens limbs, increased range of motion, improved coordination and function
